

Construction of upgrades and improvements to the Digester Facility Complex located in Manalapan, NJ are being financed through the New Jersey Water Bank (NJWB) (\$19,243,496.00). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (Infrastructure Bank) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Infrastructure Bank to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits for residents and businesses in the service area of the Western Monmouth Utilities Authority as the anaerobic digestion facility is integral to the wastewater treatment system and is required to maintain compliance with the facility's NJPDES permit.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
